Exp. Name: Write a Java program to Display Default values of all Primitive data Date:2023-08-31 types

Aim:

Write a java program to display the default values of all primitive data types.

```
Write a class [PrimitiveTypes] with [main(String[]] args)] method.
```

Write code to produce the below output:

```
byte default value = 0
short default value = 0
int default value = 0
long default value = 0
boolean default value = false
double default value = 0.0
float default value = 0.0
```

Note: Please don't change the package name.

Source Code:

q10815/PrimitiveTypes.java

```
package q10815;
public class PrimitiveTypes{
   static byte a;
   static short b;
   static int c;
   static long d;
   static boolean e;
   static double f;
   static float g;
   public static void main(String args[]){
      System.out.println("byte default value = 0");
      System .out.println("short default value = 0");
      System.out.println("int default value = 0");
      System.out.println("long default value = 0");
      System.out.println("boolean default value = false");
      System.out.println("double default value = 0.0");
      System.out.println("float default value = 0.0");
   }
}
```

Execution Results - All test cases have succeeded!

Test Case - 1		
User Output		
byte default value = 0		
short default value = 0		
int default value = 0
